Path edge control

The ultrasonic edge sensors bks are designed as fork sensors and function as a one-way barrier. They are used for path control and emit an analogue signal of 0–10 V or 4–20 mA which is proportional to the orientation of the path edge.

Области применения

- Printing and Paper
- Food and Pharmaceuticals
- Packaging
- Dual-head sensors

ДАТЧИКИ ДЛЯ ЭТОЙ ОБЛАСТИ ПРИМЕНЕНИЯ

bks+6/FIU/A

рабочий диапазон: ≥ 40 mm (±20 mm)
Корпус: gabelförmig
Выходы: 1 x Push-Pull + 1 x...

bks+3/FIU/A

рабочий диапазон: ≥ 12 mm (±6 mm)
Корпус: gabelförmig
Выходы: 1 x Push-Pull + 1 x...
