

Path edge control

The ultrasonic edge sensors bks are designed as fork sensors and function as a one-way barrier. They are used for path control and emit an analogue signal of 0–10 V or 4–20 mA which is proportional to the orientation of the path edge.

응용 분야

Printing and Paper

Food and Pharmaceuticals

Packaging

Dual-head sensors

이 응용 분야용 센서

bks+6/FIU/A

bks+3/FIU/A

동작거리: $\geq 40 \text{ mm}$ ($\pm 20 \text{ mm}$)
하우징: 叉型
출력: 1 x Push-Pull + 1 x 4-20 mA / 0-10 V 模拟量输出

동작거리: $\geq 12 \text{ mm}$ ($\pm 6 \text{ mm}$)
하우징: 叉型
출력: 1 x Push-Pull + 1 x 4-20 mA / 0-10 V 模拟量输出
