wms-130/RT	

Product description
The wms sensors require a connection to the customer´s own control and signal evaluation equipment.

Important instructions for assembly and application
All employee and plant safety-relevant measures must be taken prior to assembly, start-up, or maintenance work (see opera-tion manual for the entire plant and the operator instruction of the plant).

The sensors are not considered as safety equipment and may not be used to ensure human or machine safety!

The wms sensors indicate a **blind zone**, in which the distance cannot be measured. The **operating range** indicates the distance of the sensor that can be applied with normal reflectors with sufficient function reserve. When using good reflectors, such as a calm water surface, the sensor can also be used up to its **maximum range**. Objects that strongly absorb (e.g. plastic foam) or diffusely reflect sound (e.g. pebble stones) can also reduce the defined operating range.

Assembly instructions
- Assemble the sensor at the installation lo-cation.
- Plug in the connector cable to the M 12 connector.
- Connect the sensor to your own control and signal evaluation equipment accor-ding to Fig.2.

Signal input »Transmitter«
A signal on the input makes the wms sensor emitting a sound pulse. For this a open collector output has to earth the »transmitter« signal input for the time given in the technical data table below.
Signal output »Echo«
The signal output »Echo« subsequently transmitts all echo signals received depending on the duration as 1-bit values (echo yes/no).

Detection zones for different objects: The dark grey areas are determind with a thin round bar (10 or 27 mm dia.) and indicate the typical operating range of a sensor. In order to obtain the light grey areas, a plate (500 x 500 mm) is introduced into the beam spread from the side. In doing so, the optimum angle between plate and sensor is always employed. This therefore indicates the maximum detection zone of the sensor. It is not possible to evaluate ultrasonic reflections outside this area.
